

ABSTRACT

A method of manufacturing an undergarment includes moving a web of body panel material in a longitudinal machine direction, forming a cutout in the web, cutting the web of body panel material along the longitudinal machine direction and thereby forming a rear body panel web and a front body panel web, and connecting a crotch member to each of the rear and front body panel webs. The crotch member covers said cutout when connected to the rear and front body panel webs. A disposable undergarment having a cutout, and a method for the use thereof, is also provided.
